

Plant Native for Stronger Communities

Local Action • Global Impact • Tangible Benefits

“When you plant native, you’re not just gardening — you’re rebuilding the life support system of your community.” — Doug Tallamy

Biodiversity You Can See

- Oak trees host 500+ species of moths and butterflies alone
- Attract monarchs, hummingbirds, fireflies, and more!
- Restore critical habitat with every yard

Healthier Landscapes, Healthier People

- No pesticides = safer spaces for kids and pets
- Reduces asthma and cancer risk
- Greener spaces promote well-being

Climate-Friendly Yards

- Capture up to 5x more CO₂ with native landscapes
- Use 60–80% less water
- Skip mowing to cut emissions

Smart Economics

- Save hundreds of dollars per acre in maintenance
- Lower chemical and water bills
- Avoid 35 million tons of yard waste
